

1. DEP's current aquatic life 100% assessment goal is all stream miles within Pennsylvania.
2. DEP's current water supply 100% assessment goal is based on the number of public surface water supply withdraws.
3. DEP's current recreation 100% assessment goal is all stream miles within Pennsylvania.
4. Pennsylvania has issued a statewide fish consumption advisory of one meal per week for recreationally caught fish. More strict advisories constitute impairment. DEP's current fish consumption 100% assessment goal is streams miles that have high recreational fishing potential and where fishing for subsistence is likely.
5. Source and cause total miles may not match the total impaired mileage for each use, because each stream can have more than one source and cause of impairment.
