Good morning Shannon!

On the first item, I have attached a completion report supplied by our Surface Use group. The surface use agent believes that the "9xxxx" was assigned by the Department in 1986. At this time, API numbers were being assigned to wells that had records, but no physical location. I have no issues with using the new API number, as long as we do tie the 91011 to the records as well.

An updated plat has also been attached to show the correct API number for the well. We used the newly issued API number for the well.

Please let me know if you need anything additional for this!

Thanks,

JZ

Subject: [EXTERNAL] Prill Hopkins Order to Plug

Hi John –

I am reviewing the Order to Plug Application that was submitted by Equitrans the other day for the Prill Hopkins well.

The application references well 059-91011 as the associated API. We didn't have a record of that API, so clerical created the API 059-28510 to associate with this well going forward (to explain why the API used in the application was crossed out on the attached). Did you find records that this well was 059-91011? Or did the well head have 059-91011 on it? Please let me know, as we will want to link the two APIs together in our system to prevent confusion later.

My other question is about the API listed on the Plat: 059-28409 is listed at the well site on the plat. According to our records that API is associated with the SA Martine OG Well 1547 that is about 3000' from this location. It appears the plat shows features consistent to where the Prill Hopkins well is located (ie Hopkins Run Road, Harden farms Cluster, etc). I just want to double check with you on this – was this a typo or am I missing something here? If you believe it to be a typo, would you please revise the plat and resubmit it to me?

Thanks,
