*A proposed alternate method is subject to provisions in §3221 of the 2012 Oil and Gas Act, 58 Pa. C.S. §3221 Section 13 of the Coal and Gas Resource Coordination Act, 58 P.S. §513 and 25 PA Code §§78.75-78.75a (relating to Alternate Methods.) **Attach proof of notification of coal operator(s).***

**Describe in reasonable detail using a written description and / or diagram:**

- 1. the proposed alternate method or materials, and**
- 2. the manner in which the alternative will satisfy the goals of the laws and regulations.**

The subject well was plugged back from original TD of 7369' to 3435' before being produced. During the process of plugging back, the 5-1/2" casing was cut at 6200' and 1050' of 5-1/2" casing was left cemented in the bottom of the well. After plug back, 2" tubing was run to 3435' and cemented into place with 225 sacks of cement from 3535' to an estimated top of cement of 2450'. A bridge plug was installed at 3100'. After discussing the wellbore design, NLE/DEC and PADEP staff agreed that operationally it is best to plug out solid from 3100'.
