Importance: High

Good afternoon, Gene.

In follow up to our phone conversation, Diversified Production is the operator of the 3705122419 E & N Land 6A shallow natural gas well located in Redstone Township, Fayette County. As mentioned, E & N Land Company is the owner of the coal rights for that property.

This natural gas well is no longer producing gas. Because of this, Diversified Energy is required per PA Department of Environmental Protection regulations to complete the well plugging process to stop the vertical flow of fluids or natural gas. This will not affect the coal rights ownership of this property in any way. Per regulation, Diversified is required to notify the coal owner of our intent to plug this well using an Alternate Method. The Alternate Method process is described on the first attachment to this email.

As a formality, if you have no concerns with Diversified plugging this well using this alternate method, could you *please sign the attached form and return to me*? The form requiring signature is:

3712922419_Alt Method_Signed.pdf – Please sign in the "Optional: Approval by Coal Owner or Operator" space and print your name and title in the box below.

In addition, if you waive your right to be notified of the date and time before plugging work will begin and to be present at the plugging of this well, please sign this form -- 3712922419_NOI_Signed.pdf on the signature line in the box where it lists E & N Land Company as the coal owner (this is optional).

These are necessary for filing with the PA Department of Environmental Protection, and *we are in a bit of a time crunch*. The additional documents attached are for your review and reference.

If you have any questions, please contact me and I will be happy to assist.

Thank you.

Carla
