Describe in reasonable detail using a written description and / or diagram:

1. the proposed alternate method or materials, and
2. the manner in which the alternative will satisfy the goals of the laws and regulations.

The historical production interval in the wellbore was the Chert/Oriskany from 7036-7147'. The well was topset with 5 1/2" casing at 7046' and cemented with 150 sacks. The P&A plan proposes to set a Cast Iron Bridge plug at 7026' and balance 15.2 bbls of cement on top of the CIBP. The combination of the 5 1/2 casing annulus originally cemented thru the Onondago Limestone and the Bridge plug/cement plug inside the shoe of the 5 1/2 casing will provide sufficient isolation of the Chert/Oriskany formation. The remainder of the well is planned to be plugged according to chapter 78 Coal well regulations.
